**Congratulations on completing
PWA-I Quiz!!**

NOTE: To see which questions you got
“correct” vs. “incorrect”, scroll down to
the “**VIEW QUESTIONS**” button

Once you have clicked on the “VIEW QUESTIONS” button
below and you are SATISFIED with your results, click on the “VIEW RESULTS” button

assessment, please be sure to TAKE your results on this page and post it for credit.

REMINDERS:

- For directions on how to take a screenshot, please visit this website: <http://screenshot.org/>
- You may RE-TAKE it multiple times
- You must submit a “SCREENSHOT” of your results (*–showing your FSO Student ID*) to receive credit!

Thanks, ~Fia

Category: Chapter 3

TRUE or FALSE: You can customize a function by passing in arguments to it using different arguments to get different results.

1. ☒ True

2. ☐ False

Incorrect

Category: Chapter 3

TRUE or FALSE: You call a function by using the function name and passing arguments to the function (if any).

1. ☒ True

2. ☐ False

Correct

Category: Chapter 3

TRUE or FALSE: Calling a function and defining a function are not the same thing.

1. ☒ True

2. ☐ False

Incorrect

Category: Chapter 3

TRUE or FALSE: Variables are either global (visible everywhere in your program) or local (visible only in the function where they are declared).

1. ☒ True

2. ☐ False

Correct

Category: Chapter 4

TRUE or FALSE: A for loop package consists of initialization, a conditional test, and a loop body statement.

1. ☒ True

2. ☐ False

Correct

Category: Chapter 4

TRUE or FALSE: You should not use `new` notation to create new array.

1. ☐ True

2. ☒ False

Correct

Category: Chapter 4

TRUE or FALSE: An array holds a sequence of elements, each with its own index.

1. ☒ True

2. ☐ False

Correct

Category: Chapter 4

TRUE or FALSE: You cannot access an array element by its index.

1. ☐ True

2. ☒ False

Correct

Category: Chapter 4

TRUE or FALSE: You can decrement with the post-increment operator -

1. ☐ True

2. ☒ False

Correct

Category: Chapter 4

TRUE or FALSE: You can increment with the post-decrement operator

1. ☐ True

2. ☒ False

Correct

Category: Chapter 4

TRUE or FALSE: Assigning a value to a variable does not change its value.

1. ☐ True

2. ☒ False

Correct

Category: Chapter 2

TRUE or FALSE: Pseudocode is not what your real code should do.

1. ☐ True

2. ☒ False

Correct

Category: Chapter 2

TRUE or FALSE: There are two kinds of operators: comparison operators and logical operators. When used in an expression, boolean operators return a true or false value.

1. ☒ True

2. ☐ False

Correct

Category: Chapter 2

TRUE or FALSE: You should use uppercase M, and not m when using Math.ceil and Math.floor.

1. ☒ True

2. ☐ False

Correct

Category: Chapter 2

TRUE or FALSE: The JavaScript function `confirm()` displays a dialog with message and a space for a return value.

1. ☒ True

2. ☐ False

Correct

Category: Chapter 2

TRUE or FALSE: You cannot use a function to control the logic of JavaScript program and to perform points and actions.

1. ☐ True

2. ☒ False

Correct

Category: Chapter 2

TRUE or FALSE: The `Math.floor()` rounds a number to the nearest integer.

1. ☐ True

2. ☒ False

Correct

Category: ADDIO

TRUE or FALSE: Programmers and not necessarily need good problem thinking skills.

1. ☐ True

2. ☒ False

Correct

Category: ADDIO

TRUE or FALSE: “ADDIO” stands for Debug, Integrate/Test, and Optimize.

1. ☐ True

2. ☒ False

Correct

Category: ADDIO

TRUE or FALSE: You should begin writing programming code/syntax during the first phase of your web development project.

1. ☒ True

2. ☐ False

Correct

Category: ADDIO

TRUE or FALSE: ADDIO is a web de
that contains six (6) phases.

1. ☐ True

2. ☒ False

Correct

Category: Chapter 1

TRUE or FALSE: There are just a few
for naming JavaScript variables, and
you follow them.

1. ☒ True

2. ☐ False

Correct

Category: Chapter 1

TRUE or FALSE: JavaScript is not u
to web pages.

1. ☐ True

2. ☒ False

Correct

Category: Chapter 1

TRUE or FALSE: You should use the `<script>` tag to link to a separate Java

1. ☒ True

2. ☐ False

Correct

Category: Chapter 1

TRUE or FALSE: while/for statements execute code many times by looping

1. ☒ True

2. ☐ False

Correct

Category: Chapter 1

TRUE or FALSE: You should use Java naming conventions when naming variables.

1. ☐ True

2. ☒ False

Correct

Category: Chapter 1

TRUE or FALSE: You can add JavaScript to a web page using the script tag element.

1. ☒ True

2. ☐ False

Correct

Category: Chapter 1

TRUE or FALSE: Console messages are primarily for troubleshooting as users never see console messages.

1. ☒ True

2. ☐ False

Correct

Category: Chapter 1

TRUE or FALSE: Browsers begin executing code as soon as they encounter the

1. ☒ True

2. ☐ False

Correct

Category: Chapter 1

TRUE or FALSE: You should use `ale` `console.log` to display messages to

1. ☐ True

2. ☒ False

Correct
