## Client proposals:

1. Consultation for solutions and enhancements for two existing web applications and debugging a search engine.
  - a. Must demonstrate all three Web Applications, as follows:
    - The Duel (Part 1--3)
    - Buggy Search Engine (3 versions)
    - New Battleship application developed (4 weeks or less)

## 1. Analyze

We first begin by running your code through a proprietary software called d-bugger where your code is automatically flowcharted

```
36 document.write("<br>", name.slice(10  
,14));  
37 console.log(name.substring(10,14));  
38 document.write("<br>", name.substring  
(10,14));  
39  
40 var array1=name.split(" ");  
41 console.log(array1);  
42 document.write("<br>", array1);  
43 console.log(array1[4]);  
44 document.write("<br>", array1[4]);  
45  
46 console.log(array1.join("|"));  
47 document.write("<br>", array1.join  
("|"));  
48 console.log(array1.reverse());  
49 document.write("<br>", array1.reverse  
());  
50  
51 console.log(array1.slice(1));  
52 document.write("<br>", array1.slice(1  
));  
53  
54 console.log(array1.push("New Value"  
));  
55 document.write("<br>", array1.push  
("New Value"));  
56 console.log(array1);  
57 document.write("<br>", array1);

## Evaluations

We all contributed to information presented on the side.

We also talked and listed to everyone's ideas.

- *Debbie made the company logo and came up with the name*
- *Levance typed the information on the slides*
- *Selena populated slide content*

We need to keep tweaking the presentation by gaining insights and feedback from the client(s).
